Turning data into
better healthcare

 **LOGEX**
Healthcare Analytics

Optimising Healthcare

LOGEX is leading the way in healthcare analytics in Europe. By turning data into actionable insights, LOGEX helps decision-makers in healthcare to navigate the sensitive balancing act of affordability, accessibility, and quality of care. With an international team of over 400 experts, we help over 1,000 European healthcare providers make data-driven decisions that level up patient outcomes and that make the best possible care more accessible and more affordable.

Healthcare Intelligence Suite

The LOGEX Healthcare Intelligence Suite helps capture and analyse real-time financial, operational, clinical and patient-generated data to unlock actionable insight for decision makers in healthcare.

Financial Analytics:

Achieve greater financial and operational control

Patient Engagement:

Increase digital patient engagement and capture valuable outcome data in the process.

Real-World Data:

Unlock the value of Real-World Data

Serving clients across Europe

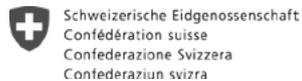

We are trusted by more than 1,000 healthcare providers in 10 countries to help them in making data-driven decisions they can stand by, with impact they can measure.

LOGEX at a glance

Europe's leading healthcare analytics expert

We're trusted allies, working alongside our clients to enhance the health ecosystem and positively impact the most meaningful value chain there is.

400+

A team of more than 400+ in more than 10 countries and growing

40m+

Unique patients touched by our analytics and data capture solutions

€100b+

In healthcare funding decisions supported annually

1000+

Public and private healthcare providers put their trust in us

Healthcare is the most meaningful value chain that exists.

Whilst demand is growing, human resources are dwindling, and financial means are limited. This makes healthcare a sensitive balancing act of affordability, accessibility, and quality.

Professionals in this field are constantly faced with ever-changing variables, forcing them to make difficult decisions that affect the lives of patients.

LOGEX helps care delivery organisations capture and identify useful data that potentially harbours valuable insights around these dilemmas.

Our advanced data capture and analytics software supports daily workflows and provides actionable insights. This helps healthcare professionals make data-driven decisions they can stand by.

LOGEX Financial Analytics

LOGEX Costing

Empower your organisation with actionable insights and precision costing data.

Our innovative costing application gives you unparalleled insight into every aspect of your financial performance, resulting in decisions you can stand by with impact you can measure.

Benefits

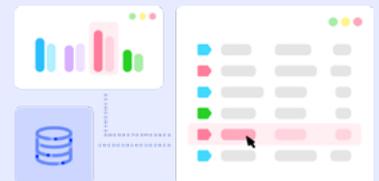

Continuous insight and engagement

We help clients elevate their cost analytics even further with quarterly data updates, patient level costing and advanced models and scenarios.

Gain deeper insight and control

In answer to the challenges of version control, multiple data sources and legacy systems we offer a cloud-based, unified budget that still allows direct input from departments.

Meet regulatory requirements

We offer cost, volume and FTE benchmarking with comparable peers to help clients create advanced reports and dashboards that provide an even deeper understanding of costs.

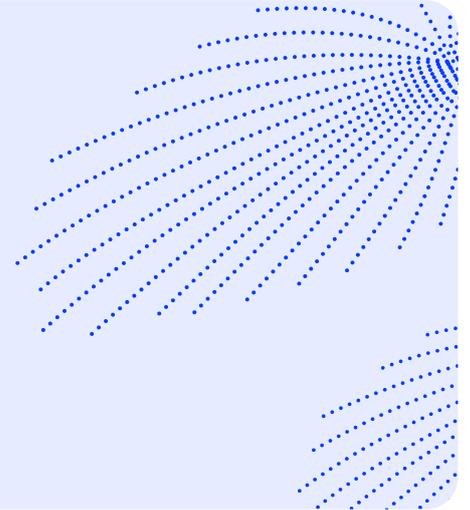

LOGEX Financial Analytics

LOGEX Budgeting

Achieve cost savings through advanced healthcare budgeting solutions.

LOGEX Budgeting seamlessly integrates cost, income, and capacity management, enabling you to drive cost savings and optimise operations efficiently.

Benefits

Activity-based Budgeting

Our Activity-based budgeting functionality offers healthcare providers the flexibility to measure the impact of portfolio changes on capacity and financials performance.

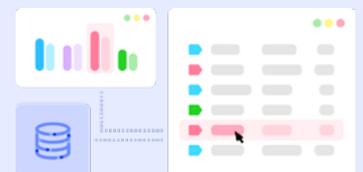

Single source of truth

In answer to the challenges of version control, multiple data sources and legacy systems, we offer a cloud-based, unified budget that still allows direct input from departments.

Robust and intuitive

Alongside standard budgeting features, LOGEX Budgeting offers an intuitive, rule-based functionality that allows users to build better budgets, faster.

LOGEX Financial Analytics

We provide tangible benefits with satisfied users to prove it

The LOGEX Financial Control Suite provides the degree of information accuracy required for our management team and clinicians to take important strategic and operational decisions confidently.

Jeroen van Roon

Chief Financial Officer at OLVG Hospital (Netherlands)

We had the desire to get direct insights in our budget based on aligned assumptions and based on a budget where volume, capacity and finances are linked.

Marnix Nillissen

Manager P&C at Radboudumc University Hospital (Netherlands)

We eliminated unmanageable Excel files across the organisation, reduced errors and increased accuracy, resulting in less time needed to manage our capacity.

Chris Harker

Head of Finance at Hull University Teaching Hospitals (United Kingdom)

healthcare

LOGEX Patient Engagement

Patient Pathways

Optimise digital patient engagement activities while collecting valuable data

We optimise healthcare by integrating digital patient journey solutions seamlessly into existing pathways and IT systems. Our adaptable approach empowers deployment of cutting-edge applications for superior patient engagement, simplified data compliance, and reduced workload for staff..

Benefits

For Patients

Our web and native apps guide patients from the comfort of their homes to the hospital and back. The journey starts with our remote outpatient app, which prepares patients for admission by setting baseline measurements and providing essential information. Once home, the app continues to support their recovery, facilitating follow-up care and virtual consultations with healthcare providers.

For Hospitals

At the hospital, our in-patient bedside add-on enriches the patient's stay with educational content, entertainment, and interactive questionnaires. We partner with leading tech providers to ensure seamless integration and support, including hardware setups like iPad procurement and wall-mount installations.

For Healthcare Professionals

Our professional applications are equipped with advanced dashboards that allow real-time data review and management. These tools aid in the seamless collection and analysis of patient data, ensuring that it can be easily accessed and utilised for better patient outcomes.

LOGEX Real-World Data

Clinical Registry

Connect Today,
Analyse Tomorrow.

Our custom-built Clinical Registry platform makes it easy for registry owners worldwide to collect, process, and analyse their outcomes data, deploying those findings towards better healthcare.

Benefits

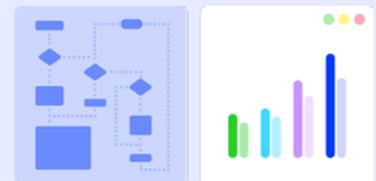

Clear Reporting

Near real-time performance monitoring to yield relevant insights and drive action with informative and customisable dashboards

Smart Algorithms

Our solution employs advanced algorithms to transform data into relevant information and valuable insights for improvement.

Simple Data Collection

Our platform enables low-burden data collection through automation, adopting international standards and re-using central data-sources.

Clinical Registry platform

How we improve the understanding of healthcare by connecting internationally

The Clinical Registry platform is deployed to securely collect, process, and analyse various national and international health outcome datasets to enable healthcare providers to benchmark and improve outcomes.

LOGEX Real-World Data

Real-World Evidence

Real-World Insight, One Data Point at a Time.

We unlock the value of real-world data by connecting hospitals, clinicians, governmental organisations, and life science organisations. We enable them to securely share anonymised data to uncover valuable treatment insights and support data-based decision-making.

Benefits

Low-Burden Data Platform

Data Platform LOGEX offers a fit-for-purpose, pan-European platform that converts different types of hospital and patient data into real-world evidence. We prepare, pre-validate, and harmonise them to a common data model.

ARWEN

The Actionable Real World Evidence Network (ARWEN) is a quickly expanding pan-European network of clinical stakeholders that believe in making data-driven and evidence-based decisions when caring for patients.

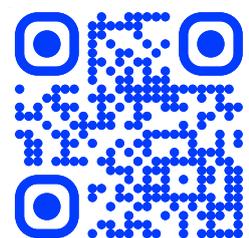

Break Down Siloes

Healthcare data is siloed, preventing the creation of insights around existing and new treatments in a real-world setting. We support you in breaking down these siloes and generating more meaningful Real-World Data.
